

**Activity:** Quick Trivia

**Target Group:** grades 1-4

**Recommended Size of group:** works well for any size

**Time Requirement:** 1-2 minutes (just enough to get their attention)

**Supplies Needed:** 1 wacky ball, or object that can be tossed and caught

**Space Requirements:** a large open space to accommodate the children

**Safety Considerations:** make sure the child knows you are passing the ball to them so they are ready to catch it.

**Rules:**

1. Facilitator randomly throws the ball to a child
2. Whichever child catches the ball answers a bike related question correctly before they can pass the ball
3. Once the question is answered correctly they pass the ball on to another child
4. Continue for a few more children and then go back to the presentation (why not quiz the teachers too!)
5. This can be used at anytime throughout the presentation when you feel like the children are losing interest, or need a break.

**Learning Outcomes:** This will help to keep the children focused and reinforce the material being presented.
